NATIONAL
TURKEY
IMPROVEMENT
PLAN

NATIONAL PLAN HATCHERIES,
NATIONAL PLAN DEALERS,

and Independent Flocks x

The publication of this list is for the purpose of developing greater efficiency in the operation of the National Turkey Improvement Plan. Additional information regarding these participants may be obtained by writing to them, or to the Official State Agency in their respective States. Due to the fact that changes frequently occur in this list, it is suggested that anyone desiring to purchase hatching eggs or poults from the listed participants write the Official State Agency for a confirmation of the classification before making such purchase. Supplements to this publication, containing changes in participation, will be published periodically.

FOREWORD

The hatcheries, dealers, and independent flocks listed in this publication are participating in the National Turkey Improvement Plan, according to reports submitted by the Official State Agencies.

The name and address of the Contact Representative and the Official State Agency are indicated at the beginning of the list of hatcheries for each of the cooperating States.

The figures in the column immediately following the name and address of the participant indicate the capacity of hatcheries and number of birds in independent flocks. The turkey hatching egg capacity is shown in the following manner: (1) Exclusive turkey hatcheries include combined incubation and hatching capacity (Manufacturer's rating for turkey eggs); (2) Where hatcheries incubate and hatch both chicken and turkey eggs and use separate machines for each, the combined incubating and hatching capacity (Manufacturer's rating for turkey eggs) of the machines used to hatch turkey eggs is reported; (3) Where chicken and turkey eggs are hatched in the same machines an estimate of the capacity used for turkey eggs is reported.

The following abbreviations indicate the type of products each dealer offers for sale:

DE	-	Hatching egg dealer
DP	-	Poult dealer
DEP	-	Dealer in both hatching eggs and poults

The products of all participants meet the requirements for the U. S. Pullorum-Typhoid Clean classification. These products may be qualified for other classifications as indicated under the headings, ROP, Certified and Approved.

The letters which appear under the classification headings indicate the variety of the products produced by the participant in that classification. The number used in connection with the code letter indicates the strain or trade name of the variety. Crosses are designated by combining the code letters and numbers of the parent stock involved, with the code letters of the male indicated first. For example, alcl would indicate Anderson Broad Breasted Bronze toms mated to Blockbuster Large White hens.

Information concerning the status of products of hatcheries not listed may be obtained by writing to the Contact Representative.

The code used to indicate the variety and strain or trade name is as follows:

a - Broad Breasted Bronze

108 Ables	114 Fruit's Oregon Giants	40 Kliever
